

Using SoftwareCentrals HTA module Windows deployments can be standardized into templates for specific users, departments, countries or any other type of delimiter.

Deploying Windows to new computers with different configurations in a multilingual global environment is challenging

Setting up new computers with the correct Windows version, settings and software is a time consuming and specialized task.

Designing and deploying Windows installations for all parts of the organization is a tedious job. Controlling who can deploy and install computers requires special efforts. Changing the installation options requires expert skills.

- Controlling who can deploy and install computers requires special efforts
- Changing the installation options requires SCCM skills

A new role based approach to Windows deployment

SoftwareCentral Dynamic HTA module provides a fully customizable web-based HTA that integrates with the build in manage device functionality in SoftwareCentral.

The HTA gives SCCM Admins the possibility to assign pre-defined computer templates to all in your IT organization or users based on their AD group membership. No need for prestaging anymore! Just boot the machine on the network and the HTA will initiate the installation job based on the access right and configuration of the assigned templates.

The advanced security roles of SoftwareCentral can be used to limit access to the software and Computer templates available in the HTA.

The HTA can be configured to allow users to reinstall their own devices without any assistance from the helpdesk. Using SoftwareCentral's HTA module gives back time to your SCCM admin's and helpdesk so they can focus on other tasks.

Fully customizable web-based HTA

Assign pre-defined computer templates

Limit access with advanced security roles

Enable users to re-install their own devices

Key benefits and features of SoftwareCentrals HTA Module

- > HTA is always up-to-date
- > HTA module uses pre-defined templates for easy setup
- > Limit access with advanced security roles
- > Allow users to reinstall their own devices
